

Not quite right

HOW can the Clarence City Council have a master plan for development with community consultation of Kangaroo Bay's crown-reclaimed and public land and then approve something so overdeveloped and inappropriate for Bellerive.

The development the council approved is nothing like community expected. The hotel and hospitality buildings by billion dollar Chinese company Shandong Chambroad resembles the Beijing Olympic Stadium complex and do not reflect Bellerive's heritage at all. The profit from Shandong Chambroad's development will no doubt be going back to China.

The crown land our State Government has allowed this company to purchase should belong to the people of Tasmania. The council, who are elected to represent ordinary people, should not have approved such a development in our beautiful bay.

This is nothing about jobs and growth or to benefit our children's future, this is about private greed and political influence and I can't help but feel something is not quite right with it all.
