

## **Too big**

BATTERY Point Tower, the Hotel Grand Chancellor, the Marine Board Building, the new black University of Tasmania block, Myer — all allowed to be built despite warnings of their adverse affect on the human scale of Hobart. Warnings which have proved to be true. We do not need a trial of an 120m building or, indeed, anything over six storeys. We need small beautiful designs which complement our beautiful city, port and mountain.
