

Transport hub please

ONE of the first items requested by Kingborough residents for the new Kingston Town Centre was a park and ride transport hub with direct access to the Southern Outlet. Given the increasing gridlock on the Outlet this clearly is a desperately needed facility. Unfortunately public transport is a State Government responsibility. As there is no effective State Government strategic planning and Metro is unlikely to fund a transport hub without government assistance, I am afraid the residents of Kingston had better get used to sitting in an ever-increasing traffic jam.
